Austroads Task Force Update

Hosted by Australian
Tunnelling Society Queensland

Join industry leaders from the tunnelling field for an update
and discussion on the Austroads Road Tunnels Task Force.

5.30 - 7.00pm AEST | Thursday 14 February 2019

Hawken Auditorium
447 Upper Edward Street, Brisbane City, Queensland 4000

The Austroads Road Tunnels Task Force coordinates updates to the Austroads Guide to Road Tunnels, and coordinates the development of technical research projects considering all aspects of road tunnel planning, design, construction, operation and maintenance.

The Australian Tunnelling Society is a representative on the Task Force.

The evening will feature an interactive presentation from Aurecon's Technical Director and ATS Austroads representative, Tony Peglas.

The discussion includes an overview of the Task Force and its activities including recently completed, current and proposed Task Force projects relevant to tunnelling.

Tony Peglas | Technical Director, Aurecon (ATS Austroads Representative)

With over 21 years' experience in tunnels and major infrastructure projects, Tony has a proven technical tunnel skillset which complements his practical experience working within design and construction projects. Tony has been involved in the detailed design of several recent road tunnel infrastructure projects around Australia, including Airport Link, NorthConnex, WestConnex New M5, and the Westgate Tunnel Project.
